## Mobile Equipment Repair

Each Dakota Fluid Power facility is fully equipped to provide complete mobile equipment repair for customers that do not have the time or facility to accomplish this work. With stock of PTOs, pumps, components, and plumbing materials, we provide prompt and professional service.

- Wet Kit Installation
- Fluid Line Repair & Plumbing
- Complete Machine Overhaul
- Preventative Maintenance
- Component Removal, Repair & Reinstallation

### WE ASK THE RIGHT QUESTIONS:

- How can we help?
- Why does a component need to be replaced/repaired or why did the unit fail?

It is our job to focus on the root of the cause to determine the best solution. We won't just give you a bandage for the problem; we want to come up with a long term solution. We will look at the system as a whole and determine what needs repair, while also identifying any alternative that may improve functionality or efficiency.
